

# Rail Scrubbing Machine

Part No. **1121013**

The RS200H is light-weight petrol driven scrubbing machine constructed from a steel sectioned frame work. It has a two-position scrubbing wheel which is easily set using the cam lever that is mounted on the machines lower handle. The machine is insulated from the track using two nylon rollers which are profiled to suit the track.

## Specification

<b>Weight</b>	47kg (approx.)
<b>Dimensions (mm)</b>	985 x 336 x 1140
<b>Engine</b>	Honda 4 Stroke petrol 5.5 hp

## Features

- Nylon rollers with integral ball bearings to ease manoeuvrability
