

The ABT4006 Switch Wear Gauge is a lightweight inspection tool allowing the user to visually check for wear in a switch and crossing using calibrated Gauge 1, Gauge 2 and P8 Wheel Profiles.

Constructed from hard wearing GRP, the Switch wear Gauge is electrically non-conductive making it suitable for use in areas of 3<sup>rd</sup> and 4<sup>th</sup> rail electrification.

The ABT4006 is approved for use by Network Rail and can be provided with alternative gauge and wheel profiles if required.

### Technical Specification

Weight	-	3.0Kg	Inspection	-	Gauge 1
				-	Gauge 2
Size	-	1820mm x 130mm x 90mm		-	P8 Wheel Profile
