

'PANSETTER'

PURPOSE:

This effective hand tool has been designed to further simplify the installation of 'Pandrol' Clips and insulators by:

- Centralising the rail.
- Lifting low sleepers.

OPERATION:

- The pin of the 'Pansetter' is inserted in the bore of the Pandrol Shoulder (Fig 1).
- The head of the tool is placed against the web of the rail (Fig 2).

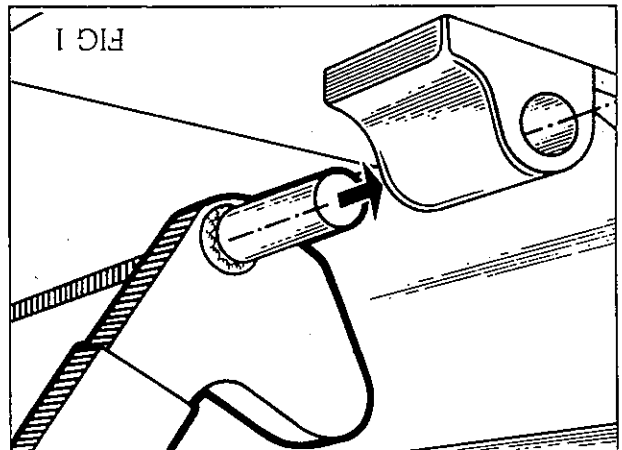

FIG 1

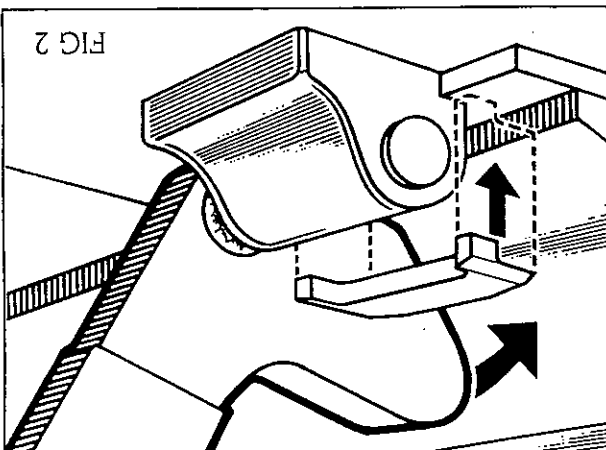

FIG 2

- The operator takes up a suitable position and gripping the handle firmly, moves it in the direction of the rail. This both:
 - Centralises the rail for easy placement of insulators.
 - Lifts low sleepers to the rail.

SPECIFICATION:

Construction Fabricated from rectangular hollow section, mild steel plate and bar.

Overall length 112 cms

(44 inches)

Weight 5.5 kgs

(12 lbs)
